## Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 11, 2005 has been entered.

### Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-4 and 9-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Nagami et al. (US 2001/0056490).

Regarding claims 1-2 and 9, Nagami discloses a packet transfer apparatus (Figures 1 and 55; abstract) for transferring cells (or frames) among first and second nodes (Figure 55, items 11) and an external routing device (items 11, ROUTER; para. 9, lines 1-3; note the router is external to the switch). The connection between the switch and the routing device is fixed (Figures 4-5, 7; Figure 6, standard bus I/F; para. 150-155). Each node and router has an inherent interface and the routing device determines an outgoing route for the cells according to destination data contained in the cells (Figure 7; Figure 12, step S162). Each ATM cell is made from or encapsulated in an IP packet (Figure 7, steps S3) having destination data. The packet transfer apparatus comprises a switch (Figures 54-55, items 11; note: crossbar switch below router), a memory for caching outgoing routing data (Figure 7, items t3 and t2; step S9-S11), and a

Art Unit: 2666

shortcut controller (Figure 4, item 203-206; Figure 7, item S2, T1 and S6; paras. 169 and 171; para. 369) for forming a shorcut to transmit the cell directly from the first node to the second node (Figure 12, step S165; Figures 13, 54 and 55) without routing by the routing device (para. 119) when the outgoing route data contained in an input cell is equal to outgoing route data cached in the memory (Figure 7, steps S2 and S6; para. 369), and otherwise, autonomously caching outgoing route data for the input cell into the memory (step S11; paras.174, 185 and 187, lines 1-3; note: ARP is not performed so that the data is cached autonomously -- para 172, lines 1-4 and last nine lines; para. 173) after the input cell has been transmitted to the routing device and back (Figure 7, steps S3-S4, S8, S11 and S12), and after the input cell has been routed to the second node by the routing device (Figure 7, steps S8-S13).

- 2. Regarding claim 3, the ATM cell is AAL5 (para. 418, last sentence; para. 430).
- 3. Regarding claim 10, the nodes transmit data according to frame relay (para. 38).
- 4. Regarding claims 4 and 11, the output route data includes a destination address and an outgoing port number (Figure 7, items t1 and t4; para 369).

## Allowable Subject Matter

5. Claims 5-8 and 12-14 are allowed.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Harper whose telephone number is 571-272-3166. The examiner can normally be reached weekdays from 11:00 AM to 7:00 PM ET.

Application/Control Number: 09/195,080

Art Unit: 2666

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Seema S. Rao, can be reached at 571-272-3174. The centralized fax number for the Patent Office is 571-273-8300. For non-official communications, the examiner's personal fax number is 571-273-3166 and the examiner's e-mail address is kevin harper@uspto.gov.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications associated with a customer number is available through Private PAIR only. For more information about the PAIR system, see portal uspto gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
